

# ROUND THREE POSTED 25 MAR 2013

Topic	RFP Reference	Question	Response
CBA01	Amendment 1, RFP Attachment 0007, COLLECTIVE BARGAINING AGREEMENT (CBA),	Attachment A of this CBA provides a list of job classifications. We have noted that there are two types of clerks associated with work reception in this list. One is the Work Reception Clerk and the other is Job Order Clerk. Neither of these two job classifications have Job Descriptions present in the SCA Directory of Occupations. Please provide information on the capabilities associated with these two job descriptions, specifically, do these job classifications include the capability to operate and maintain the SAMS system?	No additional information will be provided.
CBA02	Amendment 1, RFP Attachment 0007, COLLECTIVE BARGAINING AGREEMENT (CBA), Chugach World Services, Inc (CWSI), Northrop Grumman Technical Service, Inc (NGTSI), Local Union 377 of the U.A. Plumbers & Steamfitters and Local 558 of the International Brotherhood of Electrical Workers, page 28 of 49 of the RFP Document	Attachment A of this CBA provides a list of job classifications and wages. In reviewing the list of job classifications we noted that several positions appear to be missing. We are aware that a revised list of Job Classifications was included as a part of contract activity in 2010. Will the Government issue the missing Job Classifications from the 2010 CBA?	The DOL requirement has changed and the current CBA provided at Attachment 0007 is correct.
EX26	Exhibit T TE 5-013-M Maintenance Workload posted with Amend 1	Under Load / Test Inspections you have 106 W/O but 2656 pieces. All the rest of the items in the Exhibit are one to one ratio of W/O to Pieces. Please confirm that the 106 to 2556 is correct and W/O should not be increased? This seem out of sink with rest of the data.	The reason for the difference is a single work order may have several items to be inspected and/or load tested. Example being aircraft slings. Work order numbers are correct.
LM02	Solicitation p. 50, Section L. 5.4.3.3; Attachment 0002 Staffing Labor Mix	Section L. 5.4.3.3 stipulates that "The format for detailed staffing by higher level tasks shall include both total hours and associated Full Time Equivalents (FTE) in support for the direct labor being proposed." Furthermore it also specifies that "this staffing matrix should mirror the staffing detailed within the technical solution. (Reference Section J, Attachment 0002)." Attachment 0002 Instructions to Offerors no 2 stipulates "FULL TIME EMPLOYEE ONLY". Considering the instructions provided at Section L.5.4.3.3 please clarify how the Contractor is to present Full Time Employees in Attachment 0002. If our cost proposal is to provide Full Time Equivalents that are in direct relation to the total number of hours estimated in the BOE, are the two documents to mirror each other? And, if yes then based on the BOE estimated hours from workload data, divided by the annual hours for FTE, there could be FTE numbers that are fractional (example 5.3). Is this acceptable?	L.5.4.2.4.i & L.5.4.3.3 are updated in Amendment 0003.

LM03	L.5.4.3.5.3	<p>L.5.4.3.5.3 The following data shall be provided for all prime and teammate(s)/subcontractor(s) proposals. The requested annual accounting period data shall be presented in a manner that will allow evaluation of proposed indirect expenses for the following:</p> <p>a. Indirect Expense Rates:</p> <p>i. Budgetary data for 2014, 2015, 2016, 2017 and 2018</p> <p>ii. Year to date data for 2013</p> <p>iii. Incurred cost data for 2010, 2011 and 2012</p> <p>Should a newly formed JV with no history provide data outlined in this paragraph for all the JV partners?</p>	<p>If the JV is creating a new accounting structure and new rates then there would be no historical or current data, therefore it would not need to be provided. However, the offeror would need to provide the Government their budgetary data for the out years. If rates are being used from a partner of the JV, then all data required from Section L.5.4.3.5.3 would need to be provided for that which the rates are based on.</p>
PWS27	Attachment 1, PWS, Para. 1.7.2, Section C-1 Page16	<p>The referenced para. 1.7.2, Hazardous Materials Control Center (HMCC), is listed as reserved, but paragraphs 5.16.5 - 5.16.5.6, Storage of Materiel - HMMP, task the contractor to perform HMMS database administration in support of HMMP and other actions such as, printing hazardous material (HM) labels; maintaining current copy of the HM exception list; etc. Please clarify if there is a requirement for the contractor to operate a Hazardous Materials Control Center.</p>	<p>No. There is no requirement to operate a Hazardous Materials Control Center.</p>
RFP06	RFP, Page 12, Para 1-H, d and e	<p>Can the offeror add subcontractors not provided in Step 2 in the sub functional areas where the Offeror Self Performs?</p>	<p>If a BOA holder demonstrated in Step Two that it had the organizational capability without the reliance of teammates in a functional area, it can propose use of not previously approved subcontractor(s) to perform under that functional area in Step Three. BOA holders shall refer to their BOA Attachment 0002 to determine whether or not they are capable with or without the reliance of teammates.</p>
RFP07	Section L, Page 45 of 57, L.4.2.2.i. Mission Capability Narrative	<p>This section states the page restriction as 7 pages Narrative; 2 pages Transition-In Plan; 2 pages Mission Essential Contractor Services Plan. Does the 7 pages include the Transition-In Plan and Mission Essential Contractor Services Plan, or are these plans in addition to the 7 pages?</p>	<p>The Mission Capability Narrative has a total page limit of 11 pages (7 pages for Narrative; 2 pages for Transition-In Plan; 2 pages Mission Essential Contractor Services Plan)</p>

## ROUND TWO – POSTED 14 MAR 2013

Topic	RFP Reference	Question	Response
Ex16	Tech Exhibit AA TE-5-020 Transportation Workload Data - Pages 3 and 4.	It is unclear what rows of page 1 and/or 2 the comments shown on pages 3 and 4 are associated with. Please clarify...	Exhibit AA TE 5-020 is updated in Amendment 0001
Ex17	TE - 1- 005 - Individual Tool Sample Listing	The contractor is responsible for ensuring all mechanics, mechanics helps, automotive workers, and heavy equipment mechanics have the proper tools for duties as assigned. The government will not provide, fund or otherwise reimburse for these tools. Q. Each CLIN only references the need to price labor. Where should the contractor insert the costs for the tools required to be supplied by the contractor?	The Contractor may build this cost into their fully burden labor rate. It is up to the contractor to determine how and where in their own accounting system to apply these costs. The Contractor must provide justification and or support for these costs. Follow FAR 15.408 Table 15-2 when submitting a cost proposal.
Ex18	Exhibit K TE 5-005-S Materiel Delivery and Movement Summary, pages 10, 15, 20, 24, 29, 34, 38, 42, 46, 51, 55, 59	The referenced pages appear to originally be Word documents that are inserted between monthly spreadsheet reports. We cannot correlate the information on the Word documents to the monthly reports. Please provide guidance as to how this information is related and whether it is in addition to the monthly reports.	TE 5-005-S updated via Amendment 0002
Ex19	Exhibit K TE 5-005-S Materiel Delivery and Movement Summary, page 25	It appears that not all the lines in this spreadsheet total in the TOTALS column at the right. For example, under ACC, there is an entry of "7" under January 24 for LG PACK, but this line is not included in the Totals column. Was this intentional? (This appears to occur on subsequent pages as well.)	TE 5-005-S updated via Amendment 0002
Ex20	Exhibit F TE 5-001-S Supply Workload, page 1 of 2	It appears that not all the lines in this spreadsheet are totalling accurately in the AMOUNT column. Specifically, line items Total Document Receipts-SARSS and Shipment to DRMO-Non-SARSS add up to 11,295 and 6,125 respectively, based on the amounts listed per month. Was this intentional?	TE 5-001-S updated via Amendment 0002
Ex21	Exhibit AL (TE 1-006 GFE) and Exhibit C (TE 1-003 GFVehicles)	It is difficult to determine whether the vehicular and hand truck items on GFE are also listed on the vehicles list. Is there duplication here, or are they indeed two truly distinct lists?	All vehicles listed in (TE 1-006 GFE) are also listed in (TE 1-003 GFV). TE 1-003 also includes the GSA vehicles that are used for TMP general dispatch. The GSA vehicles are indicated by TAG's starting with "G".
Ex22	Exhibit A (TE 1-001 Support Orgs)	What approximate percentages of maintenance, supply and transportation workloads involve support to units outside the RSA garrison?	No maintenance or supply functions outside RSA garrison 95% of HHG inspections/Personal Property moves occur outside RSA garrison in surrounding communities.
Ex23	Exhibit K (TE 5-005-S Material Delivery/Movement)	The organization designations are inconsistent. For example, there is an abbreviation, "GAR", and another later reference to GARRISON; an abbreviation "UNK" and a later reference to UN. To avoid offerors making incorrect assumptions that such designations are for the same reference, please provide clarification.	TE 5-005-S updated via Amendment 0002
Ex24	Exhibit K TE 5-005-S Materiel Delivery and Movement Summary, pages 6-9	The referenced pages appear to list the delivery summary for the month of September, broken down by 'addressee' (ACC, AMC, ARMDEC, etc.), and quantifies how many of each type of delivery was made.	TE 5-005-S updated via Amendment 0002
Ex25	Exhibit K TE 5-005-S Materiel Delivery and Movement Summary, page 10	This page, titled, "September", also appears to list deliveries, broken down by 'addressee', and in some instances, what type and how many deliveries were made. According to this list, on 14 September, ARCOM received 352 pieces; are these in addition to, or included in, the 393 small packages and 20 large packages listed on page 7 under AMCOM?	TE 5-005-S updated via Amendment 0002

LM01	L.5.1.3 SECRET Facility Clearance	Per NISPOM 7-101a(1)(a): "If access will not be required in the pre-award phase, prospective subcontractors are not required to possess an FCL to receive or bid on the solicitation." Can the Government please clarify why subcontractors are required to have an FCL if access to classified information is not required in the pre-award?	Per L.5.1.3 SECRET Facility Clearance: applies "to affiliates, team members, subcontractors, etc., that will require access to classified information." Therefore, if a subcontractor doesn't require access to classified information then it isn't required to submit proof of possession of a current U.S. Facility Clearance. In order to determine if SECRET Facility Clearance is required please see Attachment 0001 PWS, paragraph 1.3.12 which states, "The government anticipates personnel working in the following areas would need SECRET clearances: program manager, assistant (or alternate) program manager, communications and electronics repairers working on controlled cryptographic items (CCI), those employees working within transportation with access mobilization / demobilization / deployment information, any employees working as classified storage container repair. The contractor is responsible to ensure anyone requiring access to information has the appropriate clearance to do so."
PWS18	PWS, Page 45, Paragraph 5.28.7.4	Paragraph 5.28.7.4 states "When an accident involves a GSA vehicle, the Contractor shall receive the SF 91, make a file copy, and forward the original copy of the SF 91 to the COR. If wrecker service is required, the Contractor shall provide telephone numbers to call for service. 1. Is the TMP responsible for the recovery of mechanically inoperable or accident damaged vehicles on and off the installation? 2. If not, is this service to be provided by a single local towing company? Is the cost for this service to be estimated by offerors as an ODC?	GSA Vehicles - (1) No. Contractor will provide wrecker service telephone number provided by GSA Accident Control Center; (2) The GSA is responsible for recovery of damaged vehicle; therefore, the successful awardee will not incur these costs.
PWS19	Exhibit AA TE 5-020-T, Transportation Workload Data	Data is provided for CY 11 and CY12. The rates differ significantly from year to year in many of the areas. Is it the Government's desire for offeror's to use an average of the two years to develop staffing levels; if not, which year should be used for developing the staffing levels in this cost type environment?	Use CY12 data to develop staffing levels; difference in data is due to BRAC and other directed service level reductions
PWS20	PWS, Page 25, Paragraph 5.18.3	Paragraph 5.18.3 states "The contractor will escort resupply tankers to the storage facility or to the customer location for direct delivery." 1. Can the Government clarify whether the 840 fuel delivery missions indicated in Technical Exhibit 5-003 Supply Workload Data represents the number of annual escort missions performed or some other type of fuel delivery supported by Bulk Fuel personnel? 2. If the 840 fuel delivery missions in fact represents the escort mission workload, can the Government provide the average number of escorts to both the storage facility and customer locations as well as the average time required to perform a single escort mission to each type location (e.g. Storage Facility and Customer location)?	1. 840 fuel delivery missions identified in Exhibit F TE 5-001-S Supply Workload Data does NOT include escort missions. 2. Average number of escort missions is 23 per month which includes carrier escort to bulk fuel storage tanks or direct delivery to customer location. TE 5-005-S updated via Amendment 0002.
PWS21	Attachment 0001 PWS, Section C-1 page 5, paragraph 1.3.4, and Section C-1 page 13, paragraph 1.5.4, and Section C-3 page 7, paragraph 3.10.1	In paragraph 1.3.4: "Contractor employees...must wear contractor furnished identification badges that display the employees name, photograph and company name..." In paragraph 1.5.4: "...The contractor will request and obtain CAC and badges required...(TA) will be responsible for approving and facilitating contractor acquisition of contractor CACs and badges through the contractor Verification System and local security offices." In paragraph 3.10.1: "The government will provide civilian...facility access badges...to contractor personnel as required." Are the badges referenced in 1.5.4 and 3.10.1 duplicative of the badges referenced in 1.3.4?	Some contractor personnel will be provided Computer Access Cards (CAC) cards if their functions require use of computers, as referenced in Para 1.5.4 and 3.10.1. All contractors will be provided identification badges as referenced in para 1.3.4. in order to access the Arsenal.

PWS22	Attachment 0001 PWS, Section C-1 page 21, paragraph 1.10.13, and Section C-3 page 6, paragraph 3.8.7	In paragraph 1.10.13, Custodial Services: "The contractor will provide custodial services...for any work, break or administrative areas assigned to it, unless...provided by another servicer." In paragraph 3.8.7: "The Government will provide scheduled custodial services for contractor operated administrative areas on a limited basis." Please provide more detail regarding the custodial services that will be provided so that we may properly plan and account for maintaining the areas assigned consistent with commercial practices.	PWS paragraph 1.10.13 updated in Amendment 0002.
PWS23	PWS, Section C-5 page 25, Para C.5.19.2	Please confirm/clarify that the time to complete the Security Screening and Evaluation Record for the ASP support personnel is included in the hours allocated in PWS para C.5.19.1.	The security screening and evaluation record is NOT included in the hour allocated. Submission of a screening form is a regulatory requirement and only takes a few minutes to complete. Once completed, government will review to determine eligibility to work in ASP.
PWS24	PWS, Section C-5 page 2, Para C.5.3.2 and TE 5-013-M, Maintenance Workload Data	It is unclear from the Maintenance Workload Data whether the Maintenance Support Team (MST) workload is included. Please advise if the MST workload is in addition to that presented in the TE or clarify what portion of that workload is performed by the MSTs.	Maintenance Support Team workload data is included as part of the overall workload data listed in TE 5-013-M.
PWS25	PWS, Section 5.19, Page 95	Ammunition Supply Services: Per exhibit F TE 5001, there is no work load data to support this effort. Attachment 0006 Mission Essential Contract Services, does not mention this requirement. The slides for industry day indicates this is a full up ASP operation. Please clarify if this a full blown ASP operation.	Only contractor requirement for ASP is to provide inventory count teams for the quarterly inventories. Government maintains full operations of the ASP.
RFP03	Solicitation Section A - General Information, Page 2, Paragraph (d)	The Task Order RFP does not identify an estimated contract award date nor a potential transition start date. This information is required to accurately forecast rates. Can the government provide the anticipated Award date for use as an estimated period of performance start date?	The Transition-In period is estimated to begin within 15 days of the award date. A formal notice to proceed will be provided to the contractor. It is anticipated that the task order award will occur in the AUG-SEPT 2013 timeframe.
RFP04	Section L, Page 43, paragraph L.1.7, L.5.4.2.6	Can subcontractors submit their sealed packages by uploading them electronically via ASFI vs. submitting it on a CD?	No, only the BOA Holder can upload to ASFI BRS system, therefore they would have to upload their teammate(s)/ subcontractor(s) cost information. If the proposed teammate(s)/subcontractor(s) wishes to provide its cost information independently to the Government follow the instructions at L.5.4.2.6.
RFP05	RFP, Section A, c, Page 2	This is described as a CPFF/FFP task order, however there are potential fee penalties described in the quality sections. Is it intended that there will also be an award fee pool in addition to the firm fixed fee?	There is no award fee. Additionally, clarification to your question, there is no "firm fixed fee." The solicitation is for Cost Plus Fixed Fee/Firm Fixed Price. See RFP Paragraph 2-H, CONTRACTOR PERFORMANCE MANAGEMENT REVIEW for more information.

# ROUND ONE POSTED 11 MAR 2013

Topic	RFP Reference	Question	Response
Att 01	Attachment 0006, Para. 2(a)2 and 2(d)	Within the Mission Essential Contract Services, the offeror is required to describe services for Passenger and Cargo Services IAW Para. 5.27 as well as Material Movement (i.e., Freight) IAW Para. 5.27. As this PWS paragraph does not include requirements for passenger service, would the government please revise and/or clarify.	Attachment 0006 is updated in Amendment 0001.
Att 02	Attachment 0006, Para. 2(f)	Within the Mission Essential Contract Services, the offeror is required to describe services for Subsistence Supply Management Office Operations IAW Para. 5.14. As this section of the PWS is "reserved," we ask that the government remove this paragraph reference from the attachment.	Attachment 0006 is updated in Amendment 0001.
Att 03	Attachment 0002 Staffing Labor Mix	Attachment 0002 Instructions to Offeror no 4 stipulates "FTE numbers are to be straight-lined." Please define what straight lining FTEs means? And, are FTE numbers to be straight-lined per year or for entire contract period of performance? Isn't this what we are looking for?	Offerors are requested to provide staffing information that will remain consistent for the duration of the effort (base period and all option periods). The government acknowledges the effort will change over time; however, no additional information has been provided for offerors to consider, therefore it is imperative offerors provide staffing consistent for all years/periods of the effort.
Att 04	DOL Redstone LSS PWS, Attachment 7 CBA, Attachment A	Is the Government or Union going to provide CBA labor codes and descriptions for the various labor positions on the CBA	No
Att 05	Attachment 0002 Staffing Labor Mix	Attachment 0002 Instructions to Offeror no 5 instructs "Productive hours per year per FTE." No 5 also provides one cell and displays an example of multiple productive hours. As it is possible to have multiple productive hours depending on the labor category, can an Offeror provide multiple numbers in the provided cell as the government example demonstrates? If not, how does the government want Offerors to account for the four different classes of employees Exempt, SCA, CBA with Local 558 & Local 377 and CBA with Local 320? Each of these classes have different productive hour requirements that an employee would be eligible to receive. If productive hours cannot be done by employee class, then the way that these variances between the classes are accounted for may greatly affect the evaluated price pending on how these labor hours are blended.	YES, It is acceptable to propose different productive hours that will apply to multiple classes of employees as the government example demonstrates. Attachment 0002 is updated in Amendment 0001.
Att 06	Attachment 0002 - Staffing_Labor_Mix	Attachment 0002 provides only 1 row/cell for productive hours. Our estimate has different productive hours for CBA, Exempt, and SCA employees. Can the contractor insert additional rows to show the different productive hours for each labor class?	No.

Att 07	Attachment 0006 Mission Essential Contract Services, paragraph 2(e) - Supply Support Activity Operations IAW Para 5.11	Should the PWS reference for SSA Operations also include paragraph 5.16?	Attachment 0006 is updated in Amendment 0001 to add Paragraph 5.16
Att 08	RFP Attachment 0007, COLLECTIVE BARGAINING AGREEMENT (CBA),Page 19 of 47 of the RFP Document	Section 14.1 of this CBA states in part: "The Company will make available the benefits contained in this Section to all employees. The minimum Company contribution for life, accident, disability, health, dental, and vision insurance plans will be \$2.00 per hour based on all hours paid (not to exceed 40 hours per week) to all employees covered by this agreement." We are aware that the agreement has been amended to show a minimum contribution of \$3.71 per hour vs. the \$2.00 per hour. Is it the Government's intent to have offerors use the old number of \$2.00 per hour or should offerors use the current requirement of \$3.71 per hour?	Attachment 0007 is updated in Amendment 0001.
Ex 01	Exhibits I & Z	Exhibits I and Z are missing from the alphabetic listing of Exhibits. Can the Government please confirm if they were skipped intentionally in the naming of exhibits or if they will be released later? Do either contain relevant workload data?	Confirmed, yes, they were intentionally skipped and left blank.
Ex 02	Technical Exhibit 5- 013-M Material Maintenance Workload Data	The referenced Technical Exhibit "Pieces of Equipment" column does not reflect any quantities. Please provide.	Exhibit T is updated in Amendment 0001.
Ex 03	Site Visit and Exhibit T TE 013 Maint Workload Data	Exhibit T TE 013 has 60 work orders for Commo-Electronics but did not see the shop during the site visit. Where is this shop at?	Shop is located in the motor pool vehicle bldg 3636 North End
Ex 04	Site Visit and Exhibit T TE 013 Maint Workload Data	Exhibit T TE 013 has 98 work orders for Weapons Shop but did not see the shop during the site visit. Where is this shop at?	Shop is located in the motor pool vehicle bldg 3636 South End
Ex 05	TE 5-013 Maintenance Workload	TE 5-013 Maintenance Workload states that This list is representative of the types and numbers of items serviced during FY 12. Does this list also reflect the number of job orders for Sustainment Maintenance or is it just represent the number of job orders that reflect Field Maintenance?	This is representative of all work orders completed with the majority (95%) being field level maintenance..

Ex 06	Exhibit B TE 1-002 Government furnished facilities and DOL Site Visit Final.pdf (Slide 10)	There seems to be a discrepancy in the supply services division facility building numbers. The buildings listed in Exhibit B TE 1-002 Government furnished facilities shows building number 3639, 5682, 8024, 8022, 8021 and 8022/24 open storage, yet the DOL facilities slide from the site visit shows the following buildings: Bldgs- 3639, 3775, 5682, 8022, 8024, 8763. Can the government clarify the list of building numbers for the Supply Division?	Exhibit B TE 1-002 is correct.
Ex 07	Tech Exhibit AA TE-5-020 Transportation Workload Data - Pages 3 and 4.	There are a number of entries in the individual sheets that show no workload data by month. Is it correct to assume there is no requirement for the contractor to provide these requirements? If there are requirements for the contractor please provide the estimated or historical workload data so and accurate staffing projection can be provided.	Exhibit AA TE 5-020-T is updated in Amendment 0001
Ex 08	Exhibit AA, TE 05-020, Transportation Workload Data, pp 8-9.	The Transportation Motor Pool (TMP) workload data is limited to information regarding #s of dispatches, drivers licenses, and vehicle specific data. There is no data provided for numbers of driver missions (i.e. Bus Support, Shuttle Svcs, Taxi requirements, Protocol (DV) missions, MHE requests etc). Without this information, there is insufficient data to bid labor (TMP Drivers). Will the Government provide TMP Workload data containing driver mission requirements?	Exhibit AA TE 5-020-T is updated in Amendment 0001 to provide workload data for bus, protocol, MHE and wrecker service data. Shuttle bus, taxi and all other workload data not performed deleted.
Ex 09	Exhibit AA TE 5-020-T, Transportation Workload Data	Several of the workload data sets do not have information for November/December of 2012 or similarly, data for December of 2012. Is the offeror to assume an average of the other months for the months where data is not provided or should the contractor assume that no workload is present during that period? [A primary example is Freight data]	Exhibit AA TE 5-020-T is updated in Amendment 0001
Ex 10	Exhibit AA TE 5-020-T, Transportation Workload Data, page 8 of 9	The Line entitled "Vehicles Dispatched" shows a dashed relationship with "744-500" in each cell. We request a clarification/explanation on the meaning of 744-500?	Exhibit AA TE 5-020-T is updated in Amendment 0001
Ex 11	Attachment 0001 PWS, Section C -5 Page 49, 5.28.13.1	5.28.13.1 The Contractor shall provide qualified bus, van or sedan drivers to support Garrison and tenant unit training and special events The workload in TE 5-020 does not provide any workload data for this requirement. Will the government provide the FY 2012 workload?	Exhibit AA TE 5-020-T is updated in Amendment 0001

Ex 12	TE 5-003 Supply Workload	The Exhibit lists 1,886 lines of ASL counted in the last inventory but also identifies 1,839 ASL lines, 8,580 NSL lines and 13,728 lines of non-standard items currently on hand. Did the number of ASL lines decrease? Is an annual inventory of NSL and non-standard items required?	No ASL did not decrease. ASL number "1839" reflected lines with inventory ON HAND only. Exhibit reflects the number of ASL lines authorized (on hand or zero balance). All ASL and NSL lines that is in the Stock Record Account (SRA) managed by SARSS require an annual inventory.
Ex 13	Exhibit AA TE 5-020-T Transportation Workload Data	Throughout the Exhibit some data is expressed different colors, and some categories of data are shaded. Is there a specific meaning to the colors and the shading?	Exhibit AA TE 5-020-T is updated in Amendment 0001 to eliminate shaded areas or different font colors
Ex 14	Exhibit AA TE 5-020 -T Transportation Workload Data Attachment 0001 - SOW, Section C-5 page 44, 5.28.1	Attachment 0001, SOW 5.28.1 states that the Contractor shall "operate a bus driver training, testing and licensing program." Exhibit AA does not provide any workload for this task. Please provide workload	Attachment 0001 and TE 5-020-T have been changed to reinforce requirement and provide estimated workload
Ex 15	PWS 5.28.9.2, 5.28.10 thru 5.28.13/page C-5 48 and C-59. Exhibit AA - TE 5-020 Transportation Workload Data.	The referenced PWS paragraphs require the contractor to provide bus, taxi, and vehicle drivers in support of various government requirements. The referenced exhibit does not reflect any workload - hours of coverage - average trip duration, or any other relevant information for these PWS requirements. Please provide the relevant workload data as without this information only the incumbent contractor can accurately forecast manpower requirements.	Exhibit AA TE 5-020-T is updated in Amendment 0001
PWS 01	PWS, Page 22, Paragraph 5.16.2.1	Paragraph 5.16.2.1 states in part, "The contractor will segregate and process receipts into two categories: Category I Materiel not due in to the stock record account (local purchased item) using Javelin COTS application, and Category II- materiel due into a stock record account requisitioned through SARSS." Because the Javelin COTS application is not widely used throughout the Army, can the Government provide a description of what this Automated Information System (AIS) is used for at the SSA and how Javelin interfaces with SARSS?	Javelin is a local COTS system that does NOT interface with SARSS. Javelin functionality allows the SSA to receive, store, put in customer location, cross dock, and track materiel that was procured via non-MILSTRIP procedure such as Government Credit Card. Javelin website is identified in the PWS para 1.11.5 that will allow contractors to acquire knowledge about its functionality.
PWS 02	PWS, Page 23, Paragraph 5.16.4.6	Paragraph 5.16.4.6 requires the Contractor to perform a 100% inventory of Center of Military History (CMH) material stored on RSA. This requirement does not specify the required frequency of these inventories e.g., semi-annual, annual, bi-annual. Can the Government specify the required inventory frequency for CMH material as well as the frequency of any other Special Inventories not expressly called out in the PWS?	Contractor will conduct inventory iaw accountable officer instructions or contractor determined schedule, minimum one per year. No other special inventories.

PWS 03	PWS, Page 45, Paragraph 5.28.7.7	Paragraph 5.28.7.7 states "The Contractor shall perform the Installation TMP Operation function using a Government Approved Process (Standard Army Management Information System/Automated Information System (STAMIS/AIS))." In view of the issue raised in the question above regarding the use of SAMS-E or SAMS-IE, can the Government specify what STAMIS/AIS it requires the Contractor to use for TMP operations functions?	The TMP currently uses SAMS-IE. SAMS-E changed to SAMS-IE in Paragraph 5.28.7.7 in the PWS
PWS 04	PWS, Section C-5 Page 25, Paragraph 5.19.1	Paragraph states "The contractor will provide two (2) inventory count teams (4 personnel) to perform required ASP quarterly inventories that will not exceed 80 hours per individual." However no ASP data was provided in the Supply Workload Data. Question: Can the government provide data reflective of the ASP inventory requirement?	Due to the nature of the requirement, hours structured into inventory count teams is required vice workload data.
PWS 05	Exhibit D, TE1-004,	The government provided the Redstone Arsenal Hazardous Management Plan but no information was provided as to the amount of Hazardous Waste that is processed. Question: Can the government provide data on the amount of HAZMAT that will be processed?	The HMMP in Supply and Services Division only processes HMMS transactions provided by the customer. The contractor does not process Hazardous Material.
PWS 06	TE 5-012-S, Customer Delivery and Retrograde List & Para 5.16.6.4	The PWS states that "the contractor shall deliver material to customers approved on the customer delivery list." The Gov't provided a number of 65,471 items annually. There is no further data as to the sizes and scope of the items, frequency of delivery etc... Will the Government provide additional workload data that identifies the number of delivery missions necessary to support 65K individual items?	Size of the materiel can range from envelopes to computers, or pallet configuration of like or mix configuration of materiel. The PRS will dictate the number of delivery missions required to support movement of materiel. Reference PWS page 31.
PWS 07	DOL Redstone LSS PWS, Page 48, Paragraph 5.28.9.2	This paragraph directs us to provide taxi service. There is no workload data provided in the TE for Transportation. There was no mention of this requirement in the in-brief and no discussion during the site visit. Is there a requirement for taxi service and if so what is the workload data?	PWS revised in Amendment 0001
PWS 08	PWS, para. 5.16.5.1, Section C-5 Page 23	Please define the HMMS acronym, as it is not listed in para. 2.2, Acronyms and Abbreviations.	PWS revised in Amendment 0001
PWS 09	PWS, Page 45, Paragraph 5.28.7.2.4	Paragraph 5.28.7.2.4 references the use of SAMS-E computer terminals. This citation appears to conflict with the requirement to use SAMS-IE at PWS paragraph C.5.1.2. Can the Government clarify whether both SAMS-E and SAMS-IE are being used at RSA to manage TMP and MMD operations or that only one of these two variants of SAMS is to be used and identify which one is actually in use?	SAMS-IE is used at RSA. PWS is updated in Amendment 0001.

PWS 10	PWS, Page 25, Paragraph 5.18.4	At the end of this paragraph is an internet link to prooftechnologies.com. However, there is no explanation in the paragraph or on the website as to what system or work this company performs in relation to the Bulk Fuel mission. Please clarify.	PWS is updated in Amendment 0001.
PWS 11	PWS, Page 49, Paragraph 5.28.10 Provide and Operate Post Shuttle Service	Please provide frequency of shuttle service operations, whether the shuttle will run only during duty hours or 24/7, on weekends; whether the shuttle will consist of buses, vans or both, and the maximum anticipated ridership on a given day.	Paragraphs 5.28.10 and 5.28.10.1 are deleted and marked reserved. PWS is updated in Amendment 0001
PWS 12	Technical Exhibit (TE) 1-003 DOL Government Furnished Vehicles	Cannot definitively tell from this Technical Exhibit whether the DOL has a dedicated recovery vehicle (Wrecker). Can the Government confirm whether the TMP or the MMD has a recovery vehicle and if so, indicate its size and location within the DOL?	Recovery vehicle (Wrecker) for Army-owned vehicles and equipment identified in TE 1-003 (LR 400-CM)
PWS 13	Attachment 0001 PWS, Section C -5 Page 49, 5.28.11.1	5.28.11.1 The Contractor shall provide protocol transportation support services 24 hours per day, 7 days per week, The workload in TE 5-020 does not provide any workload data for this requirement. Will the government provide the FY 2012 workload?	Exhibit AA TE 5-020-T is revised in Amendment 0001 to add missing workload data for protocol services
PWS 14	PWS, C-5 page 25, Para 5.18.1.1	"The contractor shall refuel in-place generators and other equipment at various locations on" Will the government provide the number of generators and there locations?	No. Refuel for in-place generators is a customer request mission and is not forecasted on a regular basis to a known location. Exhibit F TE-001-S provides workload data on FY12 fuel missions, which includes generators.
PWS 15	PWS C-5 page 25, Para 5.18.1.2	"The retail supply point shall maintain 24/7 operations. Should the computerized system go down or mechanical failure is experienced with the equipment disabling fuel dispensing, the contractor shall provide manual operations utilizing distribution tankers. Should manual operations be implemented, the contractor shall establish retail operations six (6) hours per day Monday-Friday, and three (3) hours per day Saturday, Sunday, and holidays until the system is fully restored." How many times has this system gone down in the last 12 months?	None
PWS 16	PWS C-5 page 25, Para 5.19.1	"The contractor will provide two (2) inventory count teams (4 personnel) to perform required ASP quarterly inventories that will not exceed 80 hours per individual. The government will provide a 45 day notice to the COR. The contractor will perform the inventory IAW instructions provided by the accountable officer." Will the government please clarify is this two (2) teams with four (4) personnel each team or four(4) personnel total?	4 personnel TOTAL. Each team consists of two people.
PWS 17	PWS C-5 page 2, Para 5.3.2	"Maintenance Support Teams" TE 5-013-M has no workload data for support of the Maintenance Support Teams? Will the government provide this workload data?	The workload data for on-site maintenance is embedded with all work orders. We do not differentiate on-site maintenance work orders from unscheduled work requests. Less than 5% of work performed is on-site: when performed it in normally minor repair, flat tire, vehicle won't start, etc.

RFP 01	RFP, Page 12, Para 1-H, d and e	Does the Self Perform Rule applies to Sub Functional and Functional Areas or just the Functional Areas?	Functional areas only.
RFP 02	RFP, Page 12, Para 1-H, d and e	In the event an approved Subcontractor elects not to participate in a Task Order, can we proposed another approved Subcontractor to fill gap? Ensuring the approved Subcontractor has relevant past performance and complete the Past Performance Matrix Attachment?	The Offeror may propose any approved teammate listed in their BOA Attachment 0002 during Step Three. In the case of a team member electing not to participate then the offeror may substitute another approved teammate to fill the void in that functional area in STEP 3 task order competition.
